**Subject:** Re: Coordination of Remedial Activities  
**Date:** Monday, May 9, 2011 3:56:22 PM

---

I have forwarded the design drawings for Tierra's IRM to Rob Gascoyne of Weston Siolutions (item 3 below). Rob is providing consulting services to SW.

As a follow up to our conference call this past Wednesday regarding the coordination of activities being conducted by Tierra and the activities being performed on the former Sherwin Williams property (SW) please note the following:

1. Tierra, in the interest of expediting the communication/coordination regarding these two activities, has asked Tierra's counsel (Carol Dinkins) to reach out to SW's counsel and Morris' counsel to set up a meeting amongst the technical design engineers to exchange design details and schedule details. I asked Carol to make the contact and arrange the meeting given that SW's counsel directed SW technical staff not to engage in discussion with Tierra as a result of the litigation. Tierra has requested that this meeting take place early next week given the schedule deadlines Tierra needs to meet and the fact that our scheduled in-field start date for work is June 15 (with much work continuing in terms of purchasing and contracting as we speak in preparation for that start date). We are waiting for confirmation from SW and Morris as to the date/time of the meeting.
2. Tierra has made copies of pertinent select as built drawings from the OU-1 remedy (DASS cutoff wall and floodwall) to provide to SW's design engineers. As discussed on the call Wednesday, Tierra wants to make sure that any remedial activities to be conducted on the SW property does not adversely affect the existing DASS remedy. These drawings will be provided directly to the SW design engineers during the upcoming coordination meeting to be scheduled for next week.
3. All design drawings for Tierra's removal action project to commence this summer have been provided to the NJDEP and as indicated on Wednesday's phone call, Mike Burlingame was going to provide them to Stephen Kehayes who in turn would provide them to the appropriate technical people representing SW and Morris.

Thank You.
